

INTERNATIONAL DAY OF PEOPLE WITH DISABILITIES

International Day of People with Disabilities 2021

On December 3 this year, during the annual celebration of people with disabilities, the 2021 theme is

‘Fighting for rights in the post-COVID era.’

This year, we are celebrating the challenges, barriers and opportunities for people who live with disabilities, in the context of a global pandemic.

Since March 2020, every person on earth has been impacted by drastic political, social and economic change as a result of domestic and international responses to COVID-19.

This year, International Day of People with Disabilities should be used to recognise that people who live with disabilities are among the most affected populations amid the COVID pandemic.
